

PURAMAX Penetrating Oil

PURAMAX Penetrating Oil is a mixture of fast acting solvents designed to penetrate cracks, crevices and other tight spaces. The oil will evaporate leaving a thin, transparent protective film.

APPLICATIONS

- Recommended to loosen, dry, clean, lubricate and protect: bolts, lug nuts, pipe threads, spark plugs, lock mechanisms, hinges, roller wheels, windows, distributors, tools, farm and garden equipment, sewing machines and other similar applications.
- Saturate area to be treated
- Let oil soak for several minutes
- Tap frozen parts as needed to help loosen

FEATURES AND BENEFITS

- Penetrates quickly into cracks, crevices and threads
- Frees bolts, lug nuts, and other fasteners
- Leaves a transparent thin film
- Displaces moisture from surfaces
- Protects from rust and corrosion
- Silences squeaks
- Loosens grease, tar, oil, adhesives and grime for easy removal

SPECIAL HANDLING, NOTICES OR WARNINGS

Handle as you would any petroleum product. **DO NOT INHALE.**

PURAMAX Penetrating Oil	Typical Characteristics
Contains	Petroleum based solvents
Propellant	A85 (Propane/Butane Mixture)
Flash Point, TCC °F	> 110
Viscosity	n/a aerosol
Appearance	clear, colorless to light amber liquid

Minor variations in test data are to be expected in normal manufacturing
